### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The title has been changed to the following to reflect the method claimed:

- - A method of making a low inertia roll - -.

2. The following is an examiner's statement of reasons for allowance:

Applicant's arguments, under the heading "Remarks" of the applicant's brief filed on 6/3/04, especially on page 5, lines 1-17, are convincing in overcoming the prior art rejections of the last office action. The examiner agrees that the outer strip of Engelberts does not form a cylindrical outer wall because the helical strip (33) forms a spaced helical strip. The gaps between the portions of the helical strips do not form a cylindrical outer wall as recited in the present invention claims. Furthermore, Engelberts is directed to heat exchanger whereas the instant invention is directed to a method of making a roll for a rotary printing press.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
